Hi Jean

Please see below

Obviously a bit limited in detail as all of my comments were made verbally!

Thanks

**Subject:** RE: Reinjection Application for Singleton Oil site

Dear [REDACTED]

Further to my email below and our telephone conversation early this week. I write to confirm that I am of the opinion that any further waste water imported into the site would require a variation to the existing planning consent.

The documents pertaining to the injunction of waste water at the site are in clear reference to waste water that originate from the site only. I am aware that some instances of sporadic importation have occurred in the past but I would consider these as planning breaches.

Please could you respond to this email with you clients intentions in this matter and to confirm that no further waste water will be injected into the well with the necessary planning permission.

Kind regards  
Heather

Dear [REDACTED]

Further to my email below and ours subsequent conversation, please could you provide an update this week with regard to waste water reinjection at the site.

I need to know if waste water has been injected at the well site from other sites or if it is your clients intention to do so. If the information provided does not fully confirm the operation of the site to this regard I may need to serve a formal PCN.

Kind regards

Heather

**Subject:** Reinjection Application for Singleton Oil site

Dear [REDACTED]

I hope all is well with you?

I am writing with regard to the Singleton Oil site and the recent permit application to the EA for re-injection of waste water, EPR/AP3237YS. Whilst, the SDNPA acknowledges that this application falls under the Environment Agency's permitting regulations, I am not at this stage satisfied that it doesn't need planning consent.

As such, please could you advise your clients intention with regard to the matter and the manner under which they have been operating to date. If you consider that planning consent has been provided or is not required, please could you provide details and provide an update on the permitting application.

Kind regards  
Heather
