I recently received from Tower Hamlets Council: 'Isle of Dogs, Have Your Say on Traffic Calming Measures' [www.pclconsult.co.uk /towerhamlets](http://www.pclconsult.co.uk/towerhamlets).

One important piece of information that residents need, before they have their say, is the cost of the scheme. The document does not include this information.

How much will this scheme cost?

The cost of the scheme has not yet been finally estimated as this will be dependent on the measures confirmed after the outcome of consultation. There is currently a budget of £500k TfL LIP funding provisionally allocated to improving road safety throughout the borough.

Has the council conducted or commissioned an environmental impact assessment of this scheme?

Not specifically beyond the Integrated Impact Assessment on the Local Implementation Plan 2011.

What has been the effect of the existing 20mph limit in the borough road: deaths, injuries and accidents since its imposition?

This review has not yet taken place as accident statistics are not yet available from the Met Police and TfL for a full year post implementation of the limit on a permanent basis.
