

**Requested information:**

I would like to know how much non-recyclable waste was collected from the kerbside in the two weeks after Black Friday (29th November) in 2019, compared to how much non-recyclable waste was collected from the kerbside in the two weeks before Black Friday. I would like to know this in weight if possible.

If it isn't possible to calculate how much non-recyclable rubbish was collected, then all rubbish would work.

**Response:**
