Bedford BC - OFFICIAL-Unsecure

Mr Peachey,

When the council carried out the inspections dated 03/06/2018, 17/06/2018, 01/07/2018 and 15/07/2018, a traffic cone had already been in the placed in the ground where the damaged tree had been removed. As it transpired the cone had been removed by persons unknown at the time when you drove your car over the kerb, this explains why no hazard was identified on the inspection sheets. As my previous emails stated the cone has a history of being removed and the estates department replaces it as soon as it is discovered it has been removed. I trust this serves to explain your query.

Regards,

Mike Duncan MSc MRICS
