This certificate is not valid if the serial number has been defaced or altered

ICN2/0125920

ELECTRICAL INSTALLATION CERTIFICATE

Issued in accordance with British Standard 7671 · Requirements for Electrical Installations by an Approved Contractor or Conforming Body enrolled with NICEIC, Warwick House, Houghton Hall Park, Houghton Regis, Dunstable, LU5 52X

DETAIL		

Client / Address

CCJV, Junction 12, M1, Toddington

Postcode: LU5 6HP

DETAILS OF THE INSTALLATION

Address

M1 E/1 @ M/P 50/8 B (G6)

Postcode:

The installation is:

Extent of the installation covered by this Power installation supplies to CECLB, CCTV, FTMS and Gantries.

An addition

New

An alteration

certificate

I/We, being the person(s) responsible for the design of the electrical installation (as indicated by my/our signature(s) below), particulars of which are described above, having exercised reasonable skill and care when carrying out the design, hereby CERTIFY that the design work for which I/we have been responsible is, to the best of my/our knowledge and belief, in accordance with BS 7671 amended to JANUARY 2008 (date)

Details of departures from BS 7671, as amended (Regulations 120.3,133.5):

The extent of flability of the signatory/signatories is limited to the work described above as the subject of this certificate. For the DESIGN of the installation:

** (Where there is divided responsibility for the design)

Please see the 'Notes for Recipients' on the reverse of this page

Where the Approved Contractor responsible for the construction of the electrical installation has also been responsible for the design and the inspection and testing of that installation, the 'Particulars of the Organisation responsible for the Electrical Installation' may be recorded only in the section entitled 'Christian' Christian'.

Where a number of sources are evaluable to supply the installation, and where the data given for the primary source may differ from other sources, a separate sheet must be provided which identifies the relevant information relating to each additional source.

SCHED	ULE OF ITEMS INSPECTED † See note below		
-	IVE MEASURES AGAINST ELECTRIC SHOCK		
Basic a	nd fault protection		in of mutual detrimental influence
Extra low	voltage	~	Proximity of non-electrical services and other influences
N/A	SELV N/A PELV	V	Segregation of Band I and Band II circuits or Band II insulation used
Double or s	reinforced insulation	~	Segregation of safety Circuits
~	Double or Reinforced Insulation	Identifica	
Basic F	Protection	V	Presence of diagrams, instructions, circuit charts and similar information
J	Insulation of live parts Barriers or enclosures	~	Presence of danger notices and other warning notices
	Obstacles **	✓	Labelling of protective devices, switches and terminals
_	Thomas out or routh	✓	identification of conductors
	rotection	Cables and	d Conductors
Automatio	c disconnection of supply	~	Selection of conductors for current carrying capacity and voltage drop
V	Presence of earthing conductor	~	Erection methods
~	Presence of circuit protective conductors		Routing of cables in prescribed zones
~	Presence of main protective bonding conductors	V	Cables incorporating earthed armour or sheath or run in an
V	Presence of earthing arrangements for combined protective and functional purposes		eartned witing system, or otherwise protected against nails, screws and the like
V	Presence of adequate arrangements for alternative source(s), where applicable	~	Additional protection by 30mA RCD for cables concealed in walls (where required,in premises not under the supervision of skilled or instructed persons)
~	FELV	~	Connection of conductors
V	Choice and setting of protective and monitoring devices (for fault protection and/or overcurrent protection)	~	Presence of fire barriers, suitable seals and protection against thermal effects
	icting location **	General	
N/A	Absence of protective conductors	~	Presence and correct location of appropriate devices for isolation and switching
	equipotential bonding** Presence of earth-free equipotential bonding		Adequacy of access to switchgear and other equipment
N/A Electrical s	· · · · · · · · · · · · · · · · · · ·		
LIGUTING S		V	Particular protective measures for special installations and locations
	For one item of current using equipment	V	Connection of single-pole devices for protection or switching in line conductors only
V	For more than one item of current using equipment**	~	Correct connection of accessories and equipment
Addition	al protection	~	Presence of undervoltage protective devices
~	Presence of residual current device(s)	~	Selection of equipment and protective measures appropriate to external influences
~	Presence of supplementry bonding conductors	J	Selection of appropriate functional switching devices
** for use	in controlled supervised/conditions only		
SCHEDU	LE OF ITEMS TESTED † See note below	~	Basic protection by barrier or enclosure
~	External earth fault loop impendance,Ze	V	provided during erection Insulation of non-conducting floors or walls
~	Installation earth electrode resistance, R_{A}		Polarity
V	Continuity of protective conductors		Earth fault loop impendance,Zs
N/A	Continuity of ring final circuit conductors	, .	Verification of phase sequence
V	Insulation resistance between live conductors	V	Operation of resudual current devices
V	Insulation resistance between live conductors and Earth	<i>y</i>	Functional testing of assemblies
~	Protection by seperation of circuits	V	Verification of voltage drop
echemin	E OF ADDITIONAL RECORDS* (See attached schedule)		
			Page No(s)
HULE, HUUHTON	nal page(s) must be identified by the Electrical Installation Certificate social number and page number(s).		

All boxes must be completed. 'v' indicates that an inspection or a test was carried out and that the result was satisfactory. 'N/A' indicates that an inspection or a test was not applicable to the particular installation

Page 3 of

Where the electrical works to which this certificate relates includes the installation of a fire alarm system and/or an emergency lighting system (or a part of such system), this electrical safety certificate should be accompanied by the particular certificate(s) for the system(s).
