Document Ref	TR 2177	Issue	G	CN Number	858
Originating Document	CCR 375		Date of Request	10/09/07	
Description of Change					

1. Section 5.4

Add new clauses after I:212:

M:215   The HIOCC2 algorithm must be initialised using the technique detailed in M:214 or the technique detailed in M:213.

M:214   When the HIOCC2 algorithm is initialised, the thresholding of Current Speed and Smoothed Speed must be suspended until after the first vehicle has been detected.

     When the first value of vehicle speed is received after initialisation, the Current Speed, Previous Speed and Smoothed Speed must be all set to this value. (M:214.1)

     This initialisation is applied to each lane independently. (M:214.2)

2. Section 5.4

Amend M:213:

M:213   When the HIOCC2 algorithm is initialised, the Current Speed, Previous Speed and Smoothed Speed must be set to 50 Kph.
