

As someone who has lived locally [REDACTED], I am becoming increasingly worried at the amount of land being built on in this area.

1. People need fresh air and spaces near to their homes 2. There has already been a large amount of building in this area which is not only detrimental to the environment but making Arrowe Park Road dangerously busy. Already the amount of traffic causes safety problems for pedestrians and drivers. There are constant traffic jams and the traffic never moves smartly. This also causes high levels of air pollution.

3. This is particularly important as it is so near to Arrowe Park Hospital. There has already been a large loss of greenery when the people's park was utilised to build the hospital.

My concern is for people and wildlife in the area and for this reason I state my objection.

Thank you

Yours sincerely
