

Ref: PAR/LHRAM/33687

I strongly object to the planning application for the building of a Lidl supermarket on the land off Arrowe Park Road Upton Wirral.

The building of a supermarket on that land is an absolute nonsense on many levels.

Firstly, the present traffic congestion on that roundabout is horrendous and dangerous, it will not cope with any additional traffic.

Secondly, there is absolutely no requirements for an additional supermarket, never mind in that location' but on the Wirral as a whole.

Thirdly, the Wirral green spaces are at a premium and should be protected at all costs for the health and well being of the local population and the environment as a whole.

I have only cited three reasons for rejecting this planning application, there are many more which I'm sure you are aware of..

I know the WBC along with many others, are in a difficult financial situation, but to allow developers to build on the Wirral green spaces is irresponsible and can never be reversed, its like selling off the family silver.

Central government have recognised that global warming is slowly killing our planet and have emphasised the need to protect the Green Belt and green spaces generally with a preference to focus on Brownfield only. I assume it is incumbent upon the WBC to adhere to that policy. To emphasise the policy, Leeds City Council have just been made to remove all Green Belt sites from their major housing Site Allocation Plans, keeping these precious local breathing spaces safe for us all.
