

Internal Review Response

Request Number 5524-5528

Date received : 13 July 2015

Response deadline : 10 August 2015

Issue for Review:

As you will see from my other FOI requests, for example Oldham CCG have given a full response. I am unsure why your response would cost anymore than any of the other Greater Manchester CCGs.

I would like for this to be looked at again in the hope that a response will be granted, as your colleagues in other areas have managed it, albeit outside of the timeframe given for a response.

Outcome of Review:

NHS Bury CCG has considered the request and decided to uphold its earlier decision that because of the time involved in the costs would exceed the cost limit specified in legislation.

Reasoning for Decision:

NHS Bury CCG has again considered this FOI request and the reason for the original decision.

The work required to collect the information from staff in all the CCG's departments including archived emails and documents will be very time consuming requiring additional work with our IT provider to retrieve information held within any archive files.

Whilst one CCG may have limited information and was in a position to provide this within a reasonable time and cost limit we uphold the view that the time and cost estimate given in our previous response reflect the time and staff resources that would need to be allocated to search all the data sources involved.
