in partnership with:

	Is your sexual partner more than three years older or younger than you?
How are safeguarding concerns highlighted by service users during order for their chlamydia screening test kit communicated by your online service to your local safeguarding lead?	Any identified concern is raised and discussed with a supervisor/Manager/Named or Designated Health Professional. Trust safeguarding policy is adhered to as local interagency procedures and threshold documents are consulted. Contact is then made with the Multi Agency Safeguarding Hub (MASH) and a Multi-Agency Referral Form (MARF) is sent into the MASH. In addition to the actions above a copy of the MARF is sent to the Trust safeguarding team and an Incident report is generated. All actions and outcomes are documented in the patient record.
How many safeguarding concerns highlighted by your online chlamydia screening service have been referred to your local safeguarding lead between 01/01/2017 and 31/12/2017.	None. If any concern is raised it is managed according to Coventry and Warwickshire Partnership Trust (CWPT) Safeguarding Policy and Procedure.
Where are service users who test positive for chlamydia on the online service referred for treatment.	Integrated Sexual Health Services Coventry
What are the treatment outcomes of the chlamydia positive users of the online service provider. I.e: Between 01/01/2017 and 31/12/2017 – how many service users tested positive on your online chlamydia screening service and how many of them are confirmed as having been treated by clinic or GP??	Between 1/1/17 and 31/12/17 <ul style="list-style-type: none"> • 197 service users tested positive. • 171 service users were confirmed as receiving treatment from a Sexual Health Service or GP.
