Dear Sir/Madam,

FREEDOM OF INFORMATION ACT 2000 - INFORMATION REQUEST(S)

Your request for information has now been considered.

We have decided that your request is a repeat request that has recently been submitted and in accordance with the freedom of information act 2000 section 14(1)(2), this letter acts as a refusal notice.

The reason that we have concluded that your request is repeated is that we have received duplicate requests from yourself within the last 60 working days which were refused. We have replied to your repeat requests and informed you we will no longer be replying to requests for information already released to you. In red below is the response from our SPOC for 2 requests you have submitted through "What do they know"; one of four methods of contact you have been using to contact the council.

The report that you made PRB_34770333 is not a new matter, this is the same issue that has been investigated previously as part of the enforcement investigation therefore it has not been logged and will not be acted on or investigated. We have explained several times previously that we will not revisit the matter or the decision made.

As previously advised 'open space' does not necessarily mean 'accessible space'.

Section 55 of the Town and Country Planning Act 1990 sets out the meaning of development which includes the making of a material change in the use of any buildings or other land. To determine whether a material change of use exists is a question of fact and degree. For there to be a material change of use there needs to be some significant difference in the character of the activities from what has gone on previously.

Since the 19 September 2018 we have received the following requests to the FOI inbox:

At this point you were informed that your correspondence would be directed and answered via our SPOC due to the quantity being received by various departments including our planning, complaints, and enforcement departments repeatedly requesting the information.
