

Application for a Licence to Fell Growing Trees

Part 1 - Applicant's Details

Title: [REDACTED] Forename: [REDACTED]
Surname: [REDACTED]
Organisation: Position:
Main Contact Number: 01835 822049 Alternative Contact Number:
Email:
Address: Farmton Farm Strahallan Perthshire
Postcode: PH3 1NN Country: Scotland

Agent's Details

Title: [REDACTED] Forename: [REDACTED]
Surname: [REDACTED]
Organisation: Boarder Woodland Services Position: Partner
Main Contact Number: 01835 822049 Alternative Contact Number: [REDACTED]
Email: [REDACTED]
Address: The Lodge Maxpoffle St Boswells Melrose
Postcode: TD6 0HP Country: Scotland

Part 2 - Trees to be Felled

Part 2a - Property Details

Name of Property: Strathallan

Name of Wood: Westwoodlands - Crofthead; Wester & Easter Peddiesfauld

Grid Reference (of centre of principle Felling Area): NN891152

Nearest Town or Locality Name: Stathallan, Auchterarder

Local Authority: Perth and Kinross Council

Part 2b - Felling Operations

Please provide detailed information about the proposed felling operations

When do you wish to start felling?: 15-MAR-14

When do you wish to finish felling?: 30-JUN-14

Felling Operations Table:

Felling Site/Cpt	Type of Operation	Species to be Felled	Marking of Trees	Est. Area (ha)	Approx Age (years)	No of Trees	Est Volume (m3)	Thinning Stocking Density (per ha)	
								Pre	Post
crofthead	CF - Clear Felling	Sitka spruce	paint	7.8	50	7200	3480		
crofthead	SF - Selective Felling	Elm	paint	.1	50	100	30		
crofthead	SF - Selective Felling	Birch	paint	.1	40	100	4		
wester P'fauld	CF - Clear Felling	Sitka spruce	paint	.7	50	800	280		
easter P'fauld	CF - Clear Felling	Sitka spruce	paint	1	50	800	280		
easter P'fauld	CF - Clear Felling	Norway spruce	paint	.2	40	240	100		
Total Area:				9.9	Total Volume:		4174		

Please provide further information about the proposed felling:

crofthead - majority of area is plantation SS, thinned previously, now at maturity. 30% of the area has blown over 2 main areas within central part of the wood. Previous windblow some years earlier had already opened up the canopy.

The aim is to clearfell the top end of this site to clear up windblow and fell standing timber before further windblow occurs. Although mostly SS, there are some small patches of EL and birch through and on the edge of the site. The proposal is to selectively fell these where drain clearing and new fencing for restocking is required.

Wester Peddiesfauld - over 90% of the SS in this stand has blown, so main objective is to clear the site and also remove any standing timber which is likely to blow in the near future. A well used track has been blocked and it is hoped to commence clearing here at the earliest possible date.

Easter Peddiesfauld - within this area of 1.2ha about 0.3ha is already open ground where previous windblow occurred and about 80% of the remaining timber has blown most recently. The main species is SS and is

surrounded by a belt of Norway spruce. The NS has been impacted by the SS windblow and this section will also be cleared, but leaving NS on the edge. There are a few large individual SS and NS scattered across the site which will be left and these will not be marked for felling.

Part 3 - Proposed Restocking

We normally expect the area felled to be restocked unless you are only thinning. Under the Forestry Act 1967 as amended, we usually attach conditions to the licence to secure restocking. We will discuss these conditions with you and will require your formal agreement to the conditions before the licence is issued. With reference to the Felling operations table (Part 2b), please provide information about your proposal for restocking each area where felling is taking place. You may wish to also show these proposals on a map.

Restocking Proposal Table:

Felling Site/CPT	Restocking Proposal	Species	% of Site	Area (ha)	Density (per ha)	No of Trees	Alt. Restock Site
crofthead, crofthead, crofthead	NR - Restock by natural regeneration	Sitka spruce	50	4.00	2500		
crofthead, crofthead, crofthead	NR - Restock by natural regeneration	Birch	50	4.00	2500		
wester P'fauld	NR - Restock by natural regeneration	Birch	80	0.56	3000		
wester P'fauld	NR - Restock by natural regeneration	Sitka spruce	20	0.14	2500		
easter P'fauld, easter P'fauld	NR - Restock by natural regeneration	Sitka spruce	50	0.60	2500		
easter P'fauld, easter P'fauld	NR - Restock by natural regeneration	Birch	50	0.60	2500		

Total Area: 9.90

Please provide further information about the proposed restocking:

The aim in the first instance is to allow natural regeneration to restock these sites. there is evidence on the ground that regeneration of SS,NS and birch is already successful, within the Strathallan woods and neighbouring woodland sites. The sites would be deer fenced to exculde all species of deer - red deer have also become regular visitors to the woods.

The natural regeneration would be monitored and if not adequately shocked by year 5 following felling work, replanting would be planned. The Wester Peddiesfauld wood may be less cost effective to fence with oak in tree shelters and allow natural regeneration of the birch, which is profuse.

Part 4 - Tree Preservation Orders

Are there any Tree Preservation Orders on the trees to be felled? ☐ Yes ☒ No

Are any of the trees to be felled in a Conservation Area? ☐ Yes ☒ No

Part 5 - Declarations

I hereby apply for a licence to fell the trees described in this application, and I certify that:

- I am the applicant, or an agent acting on the applicant's behalf, and have such an estate or interest in the land on which the trees are growing, as enables me, with or without the consent of any other person, to fell the trees;
- Any necessary consents from any other person(s), if required, have been obtained;
- I have made the necessary checks with the local planning authorities regarding Tree Preservation Orders and Conservation Areas;
- To the best of my knowledge and belief the information given in this application is accurate and complete
- I/We agree to any disclosure and exchange of information about my/our felling licence application with other organisations or consultees which the Forestry Commission considers necessary for the administration, monitoring, evaluation and publicising of the application or licence. Details may also be passed to successors in title to this land. I/We agree that information about my/our application, including that contained in the application, or approved licence and any other relevant documentation may be made available to the public.
- I/We note that the Forestry Commission will consider this felling licence application as an application for their Opinion, where appropriate (if this has not already been given) under Regulation 5 of the Environmental Impact Assessment (Forestry) (Scotland) Regulations 1999

Date Submitted: 14-FEB-14

DO NOT START FELLING UNTIL YOU HAVE A FELLING LICENCE
