

JOB DESCRIPTION

JOB DETAILS

Job Title:	Lead Physicians Assistant (Anaesthesia) LPA(A)
Pay Band:	Band 8b
Directorate:	Critical Care
Department:	Anaesthetic Department

ORGANISATIONAL ARRANGEMENTS

Managerial Accountable to:	Deputy General Manager
Reports to:	PA(A) Clinical Lead / Hospital Clinical Director
Professionally Responsible to:	Consultant Anaesthetist
Responsible For:	Physicians Assistant's (Anaesthesia) and Trainees
Organisation chart:	

JOB SUMMARY / PURPOSE

To provide leadership and management to the PA(A) team and to provide communication to the anaesthetic clinical leads and directorate regarding the activities of the team.

To provide the appropriate support and guidance to the PA(A) team in order for them to partake in the provision of high quality expert care.

To deliver anaesthesia for elective surgical patients using patient specific directives and within trained competencies.

Patients will be either fit and well or will have mild to moderate systemic disease.

The PA has been trained to assess the need for guidance / consultation with consultant anaesthetists and will be expected to seek this where appropriate.

A named consultant will always be available during the induction and reversal of anaesthesia and, in accordance with current College guidance will be remain proximally available during the whole procedure. However the PA can act independently during the conduct of anaesthesia and to make decisions regarding the management of expected physiological changes and make adjustments where necessary within the remit of trained competencies. Also, the PA has been trained to ask for immediate support / help where appropriate.

To assist consultant anaesthetists with the anaesthetic management of patients with severe systemic disease or those patients where there is an imminent threat to life. Anaesthetic management will include preoperative assessment and consultation, delivery and reversal of anaesthesia and postoperative care.

Other significant duties would involve cardiopulmonary resuscitation and / or other emergency, life sustaining services within the hospital environment.

MAIN DUTIES AND RESPONSIBILITIES

Manage all PA's and trainee PA's on a daily basis.

Monitor all PA's professional standards and practice providing leadership and management on all practices when called upon.

Manage the PA(A) team and to provide communication to the anaesthetic clinical leads and directorate regarding the activities of the team.

To provide the appropriate support and guidance to the PA(A) team in order for them to partake in the provision of high quality expert care throughout the entire organisation / LHB.

Rota allocation for all PA's and trainee PA's across the entire LHB.

Liaising with clinical leads and directorate ensuring a safe, professional and cost effective service is maintained across the entire organisation / LHB sites.

Preoperative Assessment

Will include a visit to the patient on the ward, taking a full medical and anaesthetic history and examination of the cardiovascular and respiratory systems and a detailed airway assessment. In addition there will be a requirement for requesting and interpretation of investigations. These may include chest x-rays, electrocardiograms (ECG's), full blood counts, urea and electrolytes, clotting profiles, arterial blood gases, pulmonary function tests.

Delivery of Anaesthesia

Will include the use of and independent interpretation of sophisticated monitoring systems including pulse oximetry, ECG, invasive and non-invasive blood pressure, spirometry, capnography and airway gas analysis, central venous pressure.

Direct patient communication including procedure explanation and reassurance.

Supervision and direction of other healthcare professionals including operating department assistants and nursing staff allocated to the anaesthetic room.

The insertion of peripheral venous cannulae, arterial cannulae and central venous cannulae – where appropriate.

The direct administration of anaesthetic induction and maintenance drugs, opiate and other analgesics, paralysing agents – where appropriate.

Insertion and verification of correct placement of airway devices including laryngeal masks,

guedel and nasal airways and endotracheal tubes using a laryngoscope.

Checking and connection of sophisticated anaesthetic machines and breathing systems (including circle systems) and utilisation of a artificial ventilation (including several different ventilation modalities) where appropriate.

Connection and administration of a variety of different intravenous fluids according to patient need.

Independent administration of prescribed drugs for cardiovascular support where appropriate.

Independent adjustment of quantity of anaesthetic drug according to depth of anaesthesia. Safe reversal of anaesthesia and extubation of patient and safe transfer of patient to the recovery area.

Postoperative Care

Will include a detailed handover of the semi-conscious patient to recovery staff including handover of the patient's airway.

Ensuring adequate analgesia, oxygen and fluids are prescribed.

A postoperative visit to ensure there are no immediate postoperative complications and adequate ongoing fluid therapy and analgesia.

This may require further patient examination of the respiratory and cardiovascular systems.

Service Management

Manage and to be responsible in conjunction with the clinical leads for qualified and trainee PA's advanced theoretical and practical knowledge in the range of work procedures and practices.

Frequent intense concentration is required.

Manage and monitor and the PA(A) teams highly developed specialist knowledge across the range of work procedures and practices.

Ensuring all practices is underpinned by theoretical knowledge and relevant practical experience.

Manage the PA(A) team with specialist knowledge over more than one discipline/function over a significant period across the entire organisation / LHB sites.

The PA(A) is expected to exercise high levels of accuracy speed and manual dexterity in procedures required for the role.

This may include –

1. Airway management may include the rapid and accurate insertion of advanced devices such as endotracheal tubes – time limited due to levels of oxygen or carbon dioxide retention – requiring use of a laryngoscope, identification of vocal cords, insertion of tube, checking of tube position and connection to anaesthetic breathing system.

2. Insertion of a central venous catheter requires full aseptic technique, identification of anatomical landmarks, correct positioning of the patient, needle aspiration of blood from central vein, seldinger wire insertion, surgical incision, insertion of cannula, checking correct placement, safe flushing of line, connection to appropriate lines, suturing line in place. This procedure may require the use of sophisticated Doppler ultrasound devices. Time limited due to total anaesthetic time.

3. Insertion of arterial cannula requires advanced hand eye coordination and a highly developed two point discrimination due to the technique of cannulating blindly based on pulse pressure alone.

The PA is accountable for his / her own professional actions.

The PA has been trained to assess the need for guidance / consultation with consultant anaesthetists and will be expected to seek this where appropriate.

A named consultant will always be available during the induction and reversal of anaesthesia and, in accordance with current College guidance will be remain proximally available during the whole procedure.

However the PA can act independently during the conduct of anaesthesia and to make decisions regarding the management of expected physiological changes and make adjustments where necessary within the remit of trained competencies. Also, the PA has been trained to ask for immediate support / help where appropriate.

Promote and contribute to the development of new ways of working in anaesthesia as the lead specialist of the role of PA(A).

Service Improvement

Formulate long term strategic plans in the expansion of PA(A) roles with the implementation of new initiatives. i.e. regional anesthesia, vascular access, high efficiency operating list and pre-assessment clinics.

Managing these extended roles across the entire organisation / LHB sites.

Specialist knowledge in new initiatives in each clinical environment over a significant period of time will be monitored and managed by the PA(A) Clinical Lead and LPA(A). Advanced theoretical and practical knowledge in the range of work procedures and practices will be the Clinical Lead and L PA(A) responsibility across the entire organisation / LHB sites.

In co-ordination with the Clinical Lead for PA's and senior management will appoint or select candidates for the PA(A) or Advanced Critical Care Practitioners (ACCP's) training across the entire organisation / LHB sites.

Identifying cost effective utilization of PA's i.e. reducing locum cost

To assist in the development of protocols and patient specific directives.

Comments on policies and contributes to change. Adheres to Health Board polices and relevant codes of practice.

Responsible for initiating and implementing Policies, Procedures, Guidelines and Standards within own area and contribute towards the ratification of Health Board wide

and national policies for the development of the PA(A) role.

In conjunction with the Clinical Director & Team Leader implement when appropriate new ways of working. Works with Multi-disciplinary Team to develop and implement policies, procedures and guidelines

Communications

Managerial representative for PA's in Clinical and Management issues. This involves communicating in extremely complicated clinical matters and to senior management level across the entire organisation / LHB sites.

A managerial link between PA (A) professional body and PA (A) Lead Consultant in all local and national matters.

Representative at Departmental meetings across the entire organisation. Includes discussions that may have an impact on service delivery or employment.

The managerial role requires the use of a high level of interpersonal and communication skills on an ongoing basis across the entire organisation.

Representative / Ambassador of the role of PA (A) in the local, national and international environment.

The ability to communicate and understand highly complex information when in consultation with consultant anaesthetists. This includes, but is not restricted to humamanatomy and detailed physiology and pathology; drugs effects and interactions including pharmacodynamics and pharmacokinetics. Also, discussions regarding the results and patient implications of undertaken investigations.

To communicate highly complex information in an understandable form to patients (according to the patient's individual level of understanding) regarding the conduct of anaesthesia, including complications/ side effects of drugs and procedures etc.

Provide professional advice to staff within areas of responsibility including teaching and training of more junior staff.

Attend regular national meetings representing the PA(A) profession, being an ambassador for Hywel Dda Health Board & Wales by contributing to advice in the development of this new role.

Communicating highly complex information in a many clinical environments across the entire hospital organisation / LHB. The communication may involve hostile, antagonistic or highly emotive matters involving all levels of staff and patients.

Exceptionally high levels of demand for communication skills is essential.

The LPA(A) role will be subject to situations where communications are highly complex, highly sensitive or highly contentious.

Use of the highest level of interpersonal and communication skills are required to manage the PA(A) team having an impact on the behavior / views of patients and staff.

To be exposed to discussions with patients preoperatively who may be known to have terminal conditions.

To explain side effects or complications of anaesthetic procedures to patients which may be life altering or even fatal.

To act as a member of the cardiopulmonary resuscitation / trauma team where the outcome is frequently death.

Due to the nature of acute speciality, to expect and deal with distressing patient circumstances including terminal diagnoses and death.

On occasions to be part of a team involved in the unexpected death of a patient. In addition, to contribute to team support to other junior members of staff in these circumstances.

Finance and Resources

Responsible to ensure all PA's and trainee PA's utilise expensive and highly complex anesthesia equipment in the correct manner.

In conjunction with the clinical lead for PA's sign off' study, travel expenses, locum sheets each month.

Responsible for a delegated budget authorising expenditure and accountable for expenditure for PA(A) and trainee PA and their specialist service.

Significant responsibility over different services and its complex and highly valuable equipment. This includes vascular access and Ultrasound machines and its highly expensive/complex adjuncts. The responsibility covers large and/or multi stranded financial/physical services.

In conjunction with the clinical lead for PA's commissioning of patient services and will hold the responsibility for budget/physical assets over a PA(A) department and service.

Responsible for the safe use and setting up of expensive and highly complex anaesthetic equipment.

Assist with the implementation of care plans across the wider anaesthetic team.

To monitor and maintain a safe, clean and therapeutic environment for staff patients and visitors, initiating appropriate action to achieve this.

To use resources appropriately to ensure high quality and cost effective service.

Contribute to team expert advice on the purchase of expensive / sensitive equipment that impact on the speciality.

Personal and People Development and People Management

Manage and hold annual appraisals for qualified and trainee PA's across the entire organisation / LHB sites.

Manage and complete monthly pay, and variation records for qualified and trainee PA's across the entire organisation / LHB sites.

Manage and maintain holiday, sickness absence; disciplinary and grievance matters; recording and holding interviews for qualified and trainee PA's when necessary across the entire organisation / LHB sites.

Undertake a key and active role in recruitment and selection decisions in PA(A), trainee PA(A) and ACCP employment within the organisation / LHB.

Provide PA's provision of highly specialist advice on HR issues which impact across the entire organization / LHB.

Management of teaching/training function across the organisation to masters level and refers to major responsibility for managing the provision of multi-disciplinary training across the organization for PA's, Trainee PA's. Statutory training throughout the organization is also included.

Responsible for liaising with Birmingham University and other professional educational and regulating bodies including the Royal College of Anaesthetist.

Participate in the education of patients and their carers.□Participate in the teaching, supervision and assessment of other team members.

Clinically supervise anaesthetic assistants and other members of staff in the anaesthetic environment in the absence of a consultants presence.Contribute to promoting,

In the absence of a consultant anaesthetist provide expert advice and support to anaesthetic assistants and trainees in times of crisis or stress facilitating access to staff counselling as appropriate.

Delivery of core training at post graduate to TPA(A) up to masters level.

Provide professional advice to staff within areas of responsibility including teaching and training of more junior staff.

Information Processing

Lead on complex non-medical research and audit activity.

Ensure that opportunities for non-medical research and audit are maximised to support the improvement of clinical outcomes and patient experience.

Ensure active PA (A) and trainee PA(A) involvement in monthly Audit and Mortality and Morbidity meetings across all the entire organization / LHB sites.

Monthly participation in the process of audit, morbidity / mortality reviews with a view to improving patient care as part of the wider anaesthetic team.

To assist the Clinical Director and Anaesthetic Team Leader in the research and evaluation of the National PA(A) Programme, including the collection and analysis of data required.

Regularly contribute to safe care plan including taking the lead in clinical audit in individual area of practice.

Contributing to the implementation of the Health Board's Research and Development Strategy and promoting evidence based care.

To update patient records and to enter patient information into theatre databases where these exist.

Maintenance of accurate and up to date logbook database of activity.

Responsible for timely, accurate and complete records both manual and electronic ensuring safety and confidentiality of information with statutory requirements.

Health, Safety and Security

Interpret and implement national policy on health improvement locally, planning and organising strategy interventions to improve health.

Works in restricted position in operating theatres on a daily basis.

Manoeuvres patients from table to bed, bed to table on a daily basis. Assist in the positioning of patients required for surgical procedures on a daily basis.

Respond to clinical emergencies performing cardiopulmonary resuscitation when required

Frequent highly unpleasant conditions such as daily exposure to uncontained body fluids (blood from arterial lines, neck lines, sputum, faeces, vomit and urine) and open wounds during surgery.

Frequent exposure to noxious volatile anaesthetic gases. Intense concentration on patient for lengthy periods whilst delivering anaesthesia e.g. watching for the usual side effects of anaesthetic and opiate drugs and reacting accordingly and adjustment of the depth of anaesthesia depending on patient responses.

The majority of anaesthetic drugs have side effects or dose effects that could produce severe harm or fatality if great care is not taken. The PA has been trained in the pharmacology of these drugs and to watch for the multitude of these dangerous effects and the need for constant vigilance.

Similarly, artificial ventilation when performed inadequately or excessively can be highly dangerous and is therefore carefully monitored. The PA has been trained in these areas and needs to deliver and monitor this procedure carefully at all times.

Quality

Ensure active PA (A) and trainee PA(A) involvement in monthly Audit and Mortality and Morbidity meetings across all the organization / LHB sites.

Ensure that any changes to practice or behaviours identified as a result of patient complaints are implemented and monitored to reduce the risk of further complaint.

Ensure that all clinical areas are regularly reviewed and their standards of care and are adopting best practice to support the organisations objective to become a Centre of Excellence.

Monthly participation in the process of audit, morbidity / mortality reviews with a view to improving patient care as part of the wider anaesthetic team.

To assist the Clinical Director and Anaesthetic Team Leader in the research and

evaluation of the National PA(A) Programme, including the collection and analysis of data required.

Regularly contribute to safe care plan including taking the lead in clinical audit in individual area of practice.

Contributing to the implementation of the Health Board's Research and Development Strategy and promoting evidence based care.

Equality and Diversity

The LPA(A) Is required to interpret overall health service policy and strategy, in order to establish goals and standards. The LPA(A) will manage the PA(A) team providing guidance for jobs with an ongoing requirement to act with minimal guidelines and set goals and standards for the team in conjunction with the clinical leads.

The PA is accountable for his / her own professional actions.

The PA has been trained to assess the need for guidance / consultation with consultant anaesthetists and will be expected to seek this where appropriate.

A named consultant will always be available during the induction and reversal of anaesthesia and, in accordance with current College guidance will be remain proximally available during the whole procedure. However the PA can act independently during the conduct of anaesthesia and to make decisions regarding the management of expected physiological changes and make adjustments where necessary within the remit of trained competencies. Also, the PA has been trained to ask for immediate support / help where appropriate.

Promote and contribute to the development of new ways of working in anaesthesia as the lead specialist of the role of PA(A).

To ensure own actions support equality, diversity and rights.

General

This job description is not exhaustive and may be subject to change as the Physicians' Assistant (Anaesthesia) role develops. For example once qualified the PA (A) will participate on the on call Rota and extend their role duties, i.e. Regional Anaesthesia.

GENERIC STATEMENTS

NHS CODE OF CONDUCT FOR MANAGERS

** For Managers only:

The post holder will be expected to adhere to the standards laid down in the NHS Code of Conduct for Managers and at all times act in a manner that reflects and promotes the values of the HB.

The post holder must ensure all activity and service objectives are effectively met in compliance with HBs standing orders and SFIs, scheme of delegated authority and employment legislation.

REGISTERED HEALTH PROFESSIONAL

** For Registered Health Professionals only:

All staff who are members of a regulatory body must comply with standards of professional practice/conduct. It is the postholders responsibility to ensure they are both familiar with and adhere to these requirements.

HEALTHCARE SUPPORT WORKERS

** For Healthcare Support Workers only:

All healthcare support workers should be familiar with and must comply with the Code of Conduct for Healthcare Support Workers in Wales.

COMPETENCE

The post holder is required to participate in the Hywel Dda PDR process and work towards meeting identified development needs.

The postholder is required to demonstrate on-going continuous professional development.

At no time should the postholder work outside their defined level of competence. If the postholder has concerns regarding this they should immediately discuss this with their Manager/Supervisor/Consultant. The postholder has the responsibility to inform those supervising their duties if they are not competent to perform a duty.

TEAM BRIEF

The post holder is required to actively participate in Hywel Dda Team Briefing in order to aid communication within the Health Board.

Managers and supervisors will regularly deliver the Team Brief verbally to their own staff teams by means of a Core Brief and additional departmental information.

RISK MANAGEMENT/HEALTH & SAFETY

The postholder has a responsibility to themselves and others in relation to managing risk, health and safety and will be required to work within the policies and procedures laid down by the Hywel Dda. All staff have a responsibility to access occupational health, other staff support services and/or any relevant others in times of need and advice.

The postholder has the responsibility for monitoring the progress on action plans in relation to risk, health and safety.

The postholder has the responsibility for the development of risk profiles and a risk register within their area of responsibility.

The postholder has the responsibility for developing systems to monitor performance against agreed performance indicators.

HARRASSMENT & BULLYING

The HB condemns all forms of harassment and bullying and is actively seeking to promote a workplace where employees are treated with dignity, respect and without bias. All staff is requested to report any form of harassment and bullying to their line manager or to any Director of the HB.

RECORDS MANAGEMENT

The postholder has the responsibility for timely and accurate record keeping and where appropriate in accordance with professional guidelines.

The postholder has the responsibility for the creation and maintenance of records in accordance with Hywel Dda policy and the data protection act.

FLEXIBILITY STATEMENT

The developing and rapidly changing nature of the organisation will require considerable flexibility from the post holder. This job description indicates the main functions and responsibilities for the post and is not intended to be a fully inclusive list and the duties and responsibilities specified in this job description are subject to change as the needs of the HB evolve. On agreement with the post holder, this job description will be amended, as necessary, in the event of future organisational and professional changes and/or personal development.

CONFIDENTIALITY

All staff may have access to confidential information about patients, staff or health service business. On no account must such information be divulged to anyone who is not authorised to receive it. Confidentiality of information must be preserved at all times whether at or away from work. Any breach of such confidentiality is considered a serious disciplinary offence, which is liable to dismissal and /or prosecution under current statutory legislation (Data Protection Act) and the HB Disciplinary Policy.

EQUAL OPPORTUNITIES

It is the aim of the Hywel Dda HB to ensure that no job applicant or employee receives less favourable treatment on grounds of gender, religion, race, colour, sexual orientation, nationality, ethnic or national origins or is placed at a disadvantage by conditions or requirements which cannot be shown to be justifiable. To this end, the HB has an Equal Opportunities Policy and it is for each employee to contribute to its success.

OUTSIDE EMPLOYMENT/OUTSIDE INTERESTS

Any other work or outside interests must not conflict with the duties and responsibilities of your attendance for work as an employee of the HB.

ENVIRONMENTAL

The Hywel Dda Health Board is committed to its environmental responsibilities. The Board recognizes that its activities, including energy consumption, waste generation, transportation emissions, water use and resource consumption, have a significant impact on the environment. As an integral part of its commitment to ensure high quality patient care, all staff have a responsibility to adhere to environmental policy and procedure at both an organisational level and within their own area of work to ensure legal compliance. Staff will do their utmost to minimize the environmental impacts of Health Board activities and services, and seek to continually improve operations to minimize their environmental effects. Staff should take note of relevant communications and attend mandatory training when required.

SMOKE FREE POLICY

All Health Board sites and premises and grounds are designated as smoke free areas. This policy applies to all staff, contractors/service providers, patients*, visitors and the public.

***Those patients staying in residential mental health units will be exempt under the Smoke-Free Premises (etc) Wales Regulations 2007.**

SAFEGUARDING VULNERABLE ADULTS

Every employee of the Health Board, whatever their job, role, profession, status or place of work, paid or voluntary, has a responsibility under the *Adult Protection Policy and Procedures* to:

- Understand the nature of abuse, how people might be at risk of harm and work to prevent it.
- Know what the *Adult Protection Policy and Procedures*, and their own service's local operational arrangements to protect vulnerable adults, require of them.
- Know how to make an adult protection referral if they have concerns.
- Report allegations or suspicions of adult abuse to their line manager, Social Services, Health or the Police. This includes suspicions about a colleague or manager, irrespective of their status, profession or authority. This includes whistleblowing.
- Know what services, advice and support are available locally to vulnerable adults, and how to access help needed.

INFECTION CONTROL

"The document *Commitment to Purpose: Eliminating Preventable Healthcare Associated Infection: A Framework of actions for healthcare organisations in Wales* stipulates that all staff must understand their responsibility and accountability for Infection Prevention & Control and the Health Board must be assured of this on an ongoing basis".

IP&C is the personal and individual responsibility of all Health Board staff. All staff have a responsibility to protect and safeguard patients, service users, visitors and employees against the risk of acquiring healthcare associated infections.

This responsibility includes being aware of the content of and consistently observing, Health Board Infection Prevention & Control Policies and procedures; and best practice guidance in order to maintain high standards of Infection Prevention & control.

GENERAL

The postholder needs to ensure they are familiar with their terms and conditions of service,
