

Dear Mr. Doyle,

You can find the March 2019 Key Decision Report giving the current position on the proposed 20 mph pilot schemes [here](#).

Since we are not yet at the stage of installing signs, painting road markings or making the associated traffic orders, we have spent only that portion of the estimated £50,000 implementation costs identified in the March 2018 Public Realm Scrutiny Committee report on 'before' traffic surveys - £3,825.

Regards,
