Subject: Cumrbia Flouridation Questions to allow letter to SoS

Importance: High

Hi All,

In order to send off the first letter to secretary of state, can any/all of you help to answer the Qs below?

1. Can any of you fill in the blanks in the following?:

The population and boundary area currently supplied from the Ennerdale and Crummock water treatment works will be the same population as supplied from the Williamsgate water treatment works with the exception of some properties within Buttermere. The domestic water supply for Buttermere has until ??? been supplied by a separate water treatment works using Buttermere as the water source. The plant equipment is no longer fit for purpose and supply was switched to Ennerdale in ???.

The number of properties that will be added is ??? and is therefore less than 20%.

Also can anyone answer the following:

1. When did [REDACTED] confirm that the switch to the Williamsgate water treatment works will amount to a variation of an existing fluoridation scheme?
2. What was done to fulfil the requirement for 'preliminary scoping'?
3. What has already been done for stage 2 to "commenc[e] the statutory process by making a formal proposal to the secretary of state for health under s88I of the Water Act 1991."?
4. What has been done to consult with [REDACTED] on whether the proposal is operable and efficient? What is their opinion on whether it is operable and efficient? (assuming you agree that it is, [REDACTED]?)
5. What is the cost implication of the variation? Who bears this/these cost(s)?

Thanks
[REDACTED]

Hi all – in terms of the scope etc of the scrutiny review, see attached docs. I've not seen actual dates for review sessions yet.

Cheers

Hi [REDACTED]

That's strange. I think something has happened to the invites after lots of amendments. I'll send out a fresh batch for future meetings.

In terms of actions from today's meeting:

1. [REDACTED] said that he would chase Cumbria CC's legal dept re: the operable and efficient letter
2. [REDACTED] said that he would send some information over about the review

Best wishes

Hi [REDACTED]

Thanks for letting me know.

As you say we hope to see [REDACTED] and [REDACTED] today.

Also I wanted to draw your attention to the UK CMOs' statement on water fluoridation which was published today: <https://www.gov.uk/government/publications/water-fluoridation-statement-from-the-uk-chief-medical-officers>

Best wishes

Dear All

I'm really sorry but I can't make this meeting. We are struggling with responding to all our schools at the moment.

I have let [REDACTED] know so hopefully he will be there as well as [REDACTED]

THanks

All – in getting this ready to send, I realise the letter references a copy of the ‘proposal’. Does anyone have a copy of this?

Secondly – [REDACTED] all, who should sign this letter? I’m assuming [REDACTED] but should we have portfolio holder or leader on it too?

Thanks

Thanks everyone for the speedy response. Have asked [REDACTED] for a once-over on the [REDACTED] and we'll get it off to [REDACTED] for approval. We've modified it slightly so that [REDACTED] can delegate authority to [REDACTED] to send the second letter, which should speed things up.

Hi [REDACTED]

I've filled in some gaps...

The population and boundary area currently supplied from the Ennerdale and Cornhow water treatment works will be the same population (70,000 properties) as supplied **with fluoridated water** from the Williamsgate water treatment works with the exception of some properties within Buttermere. The domestic water supply for Buttermere has until 2018 been supplied by a separate water treatment works at Buttermere using Sail Beck as the water source. The plant equipment is no longer fit for purpose and supply was switched to Ennerdale in 2018.

The number of properties that will be added is 40 and is therefore less than 20%.

I've added the section in yellow as a clarification. For information, there will be three outlets from Williamsgate WTW – two of the legs will be fluoridated and these will supply the areas previously supplied from Ennerdale and Cornhow. However, there will be a separate leg leaving the Williamsgate WTW that will not be fluoridated that will supply the Quarry Hill WTW supply area (this area has never been fluoridated).

With regards to operable and efficient – we sent a letter confirming that the scheme will be operable and efficient (attached), signed by the Area Business Manager who will be responsible for the operation of Williamsgate WTW. Please let me know if you need anything further.

Thanks

Hi [REDACTED]

I've inserted the updated details of who to cc the letter to along with the email address for the Secretary of State's private office.

If you could let me know once it is sent it would be much appreciated so that I can orchestrate a response as swiftly as possible.

Best wishes
