

FOI-CAS-2186181-W8F4R8 - Care Planning recording

- How do you currently handle care planning in your care homes - electronically or on paper?
In Shropshire we have one nursing home that we are responsible for. The current situation is that care planning is on paper but we are interested in the possibility of moving to an electronic system of care planning and are considering the options available.
- If you're using electronic care planning, who is the current supplier, what is the value of the contract and when will the contract expire? n/a
- If you use paper for care planning, do you have any plans for public tender within the next 12 months?
However, at this stage have not moved to a tender as have not yet decided what we need. This has been delayed by the Covid-19 pandemic which has resulted in the establishment having to focus on a number of other areas.
- What are the contact details of the procurement officer?
