

FOI3758 – Concerning Disinfection in NHS Premises

We can confirm that Southern Health NHS Foundation Trust can advise as follows in response to your Freedom of Information Request:

1. What process/products do you use for disinfection/decontamination additional to a manual cleaning programme, for instance for a terminal clean or an outbreak?
2. Do you use Hydrogen Peroxide Vapour (HPV Fogging) or Ultraviolet (UVC) for decontamination?
3. What companies do you use and how many units do you have in operation for both HPV and UVC?
4. Is the equipment operated by NHS staff, or by an outsourced Contract Cleaning Company? If the latter, who is the contractor?
5. Were these systems purchased via a tender or mini competition?
6. Were these systems purchased through a framework agreement or direct sale?
7. Were these systems purchased outright, or via a lease rental package?
8. What were the costs of the systems when new?
9. Who is your current supplier and are you under contract?
10. What is the annual value of this contract, including consumables, extended warranties and maintenance agreements?
11. What is the start and end date of the contract?
12. Do you use a managed service in addition to your own operation?
13. Could you provide me with the contact details for the person/s responsible for the fields below?
 - Infection Prevention and Control
 - Estates & Facilities / Domestic
 - Procurement
 - Housekeeping

We do not use anything from above listed but a manual process; the questions do not apply to Southern Health Trust.
