Improving Performance

Internal

The Force All Crime sanction detection rate has improved year on year to 42.5%.

The detection rate for Violent Crime has also improved on last year to 63.5%.

Recorded Criminal Damage and Arson has decreased by 8.8% year on year, with Central displaying a 15.9% reduction on last year. The detection rate has also improved year on year to 22.0%.

Recorded Crimes against Young Victims have decreased 7.7% on last year. The detection rate for Crimes against Young Victims has also improved on last year, with a detection rate of 46.2%.

92.9% of source documents have been entered on PNC within 24 hours, achieving the 90.0% target. The percentage of court results entered on PNC within 10 days is also above target, with 85.8% entered in 10 days against a target of 75.0%.

The target of answering 90% of 999 calls within 10 seconds is being achieved, with 93.0% of calls answered in target.

91.5% of Public English calls were also answered within the target time of 40 seconds, which achieves the 90% target.

Partnership

The detection rate for Racially Aggravated Crime is achieving the 55% target, with 60.6% of crime detected. All divisions are achieving the target.

The number of child road traffic casualties resulting in death or serious injury has decreased by 11.4% year on year.

Efficiency and Development

YTD sickness targets for Police Officers have been achieved in Western and CSD. YTD sickness targets for Police Staff have also been achieved in Central and OCD.

Areas for Improvement

Internal

Recorded Burglary Dwelling has increased year on year in across all divisions, with an overall increase of 22.9%.

The Burglary Dwelling detection rate is displaying a decrease on last year, with 24.5% of burglary dwellings detected.

Recorded Vehicle Crime has increased year on year in Central and Eastern by 3.6% and 18.1% respectively, although Western is displaying a 7.1% decrease. The Vehicle Crime detection rate has decreased by 1.8 percentage points to 18.4%.

Serious Acquisitive Crime has increased by 12.8% on last year.

Partnership

The number of people killed or seriously injured in RTCs has increased 18.2% year on year. RTCs involving young drivers involving death or serious injury have also increased year on year.

The number of disqualified drivers arrested has decreased by 19.3% year on year at Force level, thus not achieving the 10% increase target.

Efficiency and Development

Force sickness has increased year on year for both officers and staff.

Central officer sickness targets are not being achieved, with a year on year increase in sickness hours per head. CSD staff sickness targets, and OCD officer sickness targets, are also not being met.

Force Level - NSIR Group YTD Proportionality

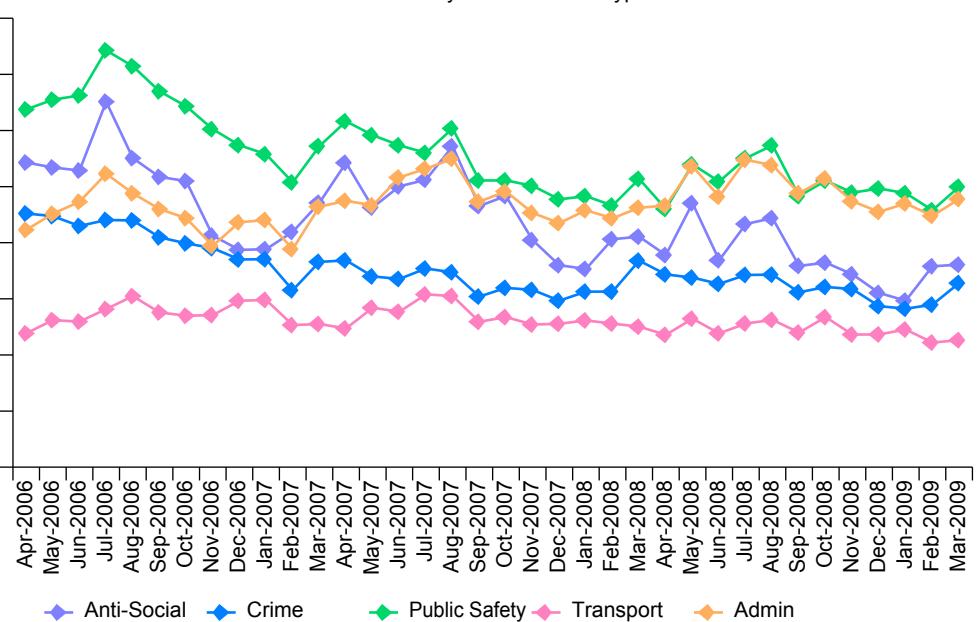

NSIR was implemented in December 2005. The standard will provide a high quality data set, which will facilitate and support a more effective operational approach to the reduction in incidents or patterns of ASB (as an example), as well as enhancing, at a local level, the provision of policing and the quality of service delivery to the public.

For a full list of incident codes go to the IMG/MID Intranet site or request from the below email.

The arrests summary is a count of all PACE arrests for notifiable offences. This is a count of actual arrests, not a count of persons arrested. If a person is arrested for multiple offences, all of the arrests for that individual are counted.

The following radars represent force and divisional performance during a rolling 12 month period, ending on the last day of the month stated above. This is in comparison to the Most Similar Forces Average for the 12 month period up to the end of September 2008. The shaded area represents the MSF Average, the thick black line represents the force/divisional performance. An above average NWP performance exceeds the boundary of the MSF average shaded area.

March 2009

Total hate crimes refers to the total number of distinct crimes with a hate crime flag. Total instances is a count of the total hate crime types (racial, religious etc) in the reporting period. This may differ from the hate crime count as any individual crime could have multiple hate crime types associated with it.

March 2009

The following analysis is to be used by North Wales Police to track efficiency performance. However, it should be noted that any formal claims for efficiency savings will be made in accordance with HMIC guidelines.

The analysis quantifies the difference between YTD sickness for 08/09 and the equivalent YTD Baseline sickness figure of 07/08 (with this difference shown in the 'Variance' column for each department and in total, in the table below). Efficiencies are then calculated by applying 2008/09 unit costs per hours sick leave, derived from the ABC model.
