Thanks for that. I think that it is a good idea to take the temperature with HMAG before we finalise this.

, but we still need to get this to Kate M on Friday, so we will need to move without their input (Although I have copied from whom I would appreciate any final thoughts in absence. did see the earlier iteration last week and I have subsequently taken his comments on board).

So I think that you and I need to finalise these green and blue bits and the overall picture after your meeting tomorrow, then send a final draft to and tomorrow afternoon and then on to Kate on Friday. I will put a slot in with you for 12.30 tomorrow but I'm free earlier if your meeting finishes early.

Thanks,
Nichola

Nichola

I have had another read of this and understand your questions re the blue sections but as is already on leave I would like to wait to comment further until after HMAG tomorrow to get an idea what everyone else is doing. I just put in the distance from the stones.

Is that OK? Normally the comms teams would all be in touch

HMAG is 10 -12 30 tomorrow although we might not be that long so could speak afterwards if that suits?
Thanks
