Site (Street/Park/etc) : Cranford road

Location : Aberdeen

Locational Details : In front of house

First Type of Fault : Poor Road Surface

Additional Information : Hello I&apos;m just curious to see if Cranford road is on the list of streets to get resurfaced? The entire road is littered with pot holes and as people come over the speed bump at mine chunks of road are being flung up and damaging my wife&apos;s car. Your boys have in the past put cold lay tar into various holes but this hardly ever lasts a month before the hole reappears. I do have a picture of one set of potholes and the size of chunks being thrown out if you wish I can send them on. Thanks [REDACTED]

Site (Street/Park/etc) : Cranford Road

Location : Mannofield

Locational Details : In front of house

First Type of Fault : Poor Surface

First Fault Details : The footpath is dangerously slippery.

Second Type of Fault : Other

Second Fault Details : Slime needs to be removed.

Additional Information : the pavement outside 66 Cranford road, on the corner of Cranford terrace is VERY dangerously slippery. The surface is coated with a thick coating of slime. This route is used by many parents from manofield area walking children to school and elderly visitors to the Cranford Nursing home. This could cause serious injury as I have witnessed slips, trips and falls frequently this year.
