

FOI 003824 - Hollycroft road traffic accident - Response shown in bold

On 19/10/21 a serious RTA occurred in Hollycroft, Hinckley between Factory Road and Stanley Rd. Fire, ambulance & police services attended, 4 vehicles were involved (all subsequently written off), one person was taken to hospital & the driver who caused the mayhem ran off before the police arrived. The road was closed for several hours. But for a few minutes, one of my family members would have been seriously injured or worse.

Despite 2 attempts at traffic calming, speeding is still rife along this stretch of road, so I have tried to establish from the police the causes they have identified for this RTA and what, if any, steps they have taken to prevent a repetition. They have refused to provide the information saying that any comments they have in this area have been provided to LCC and directed me to you.

So, what information do you have, including from investigations that you may have undertaken yourselves?

The incident referred to was a damage-only collision and thus we have no further information regarding the collision.
