Dear Parent / Carer

Re: Liverpool Children's Community Service

The independent/private school your child attends has chosen to opt out of offering School health services.

I am writing to ensure your child is not disadvantaged and has access to the full range of services we provide to children, young people and their families, listed is an example of what we offer ;

- Promoting healthy lifestyles
- Providing health screening
- Supporting pupils with conditions like asthma, diabetes, epilepsy or mental health problems
- Providing health and sex education
- Work with parents and carers to promote good parenting and giving advice on specific issues such as bedwetting or head lice
- Administering immunisation programmes. Arrangements can be made to catch up any vaccinations that have been missed.

To arrange an appointment, or discuss your child's needs contact your school health practitioner at the number above.

Yours sincerely
