Subject: Student Lifecycle Project - Major demonstrations by short listed suppliers

Issued on behalf of Christine Lowther.

Please pass on to all staff .

Dear Colleague,

I am writing to invite you to come along to University wide demonstrations being delivered by the three shortlisted suppliers of the solutions the University is considering procuring for it 's new student information system. These demonstrations will be the penultimate part of the dialogue phase of procurement which has already included preliminary demonstrations by all three, which you may have attended. The suppliers will be demonstrating their solution following detailed discussions with a range of University staff. Each demonstration will cover the full student lifecycle and will therefore be of interest to a wide range of staff, both academic and administrative, and students.

We are keen for as many people as possible to attend the demonstrations and hope that you will be able to do so. Ideally, we would like you to attend all three events, although we appreciate that you may not be able to do so.

What is important is that we have a range of staff from across the University at each demonstration.

We will be asking you to provide the Project Team with feedback around the strengths in each of the demonstrated systems and any concerns you may have.

Your contribution is vital and will help inform the ongoing dialogue and evaluation.

I hope that you will be able to attend. An invitation is also being sent to all heads of departments asking them to forward to relevant members of staff.

Details of the demos are given below. Please email slp@gla.ac.uk indicating which of the demos you will attend.

I look forward to hearing from you and thank you for your continued interest in and assistance with the Student Lifecycle Project.

Christine

Demonstration dates

| | | | |
