

Technical Rescue Centre new DaMoP schedules Guidance Note

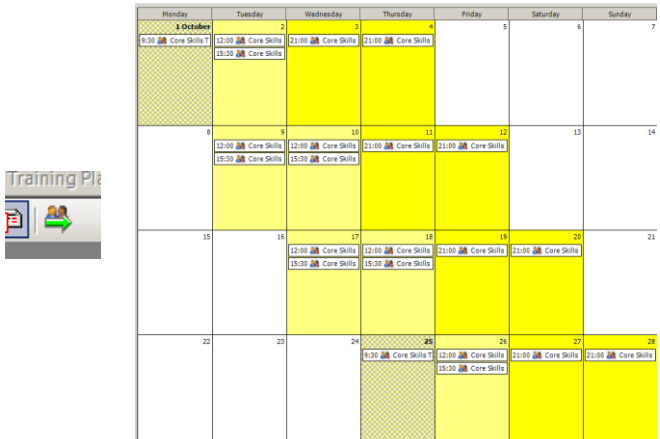

The new Core Skills Schedule for Technical centres has the same functionality with the training diary, but there is a second Core Skills session for each day shift that is not a Pump or Pump Ladder Strategic Resource shift. Access will still be via the Station diary icon on your desktop.

The new Core Skills sessions are longer, but the allocation, planning and completion processes are unchanged. The sessions appear initially on the Training Diary in the 'Watch Training' window; the Green Arrow button will auto assign these onto the appropriate shifts.

Views of the Training Diary, pre and post auto assignment.

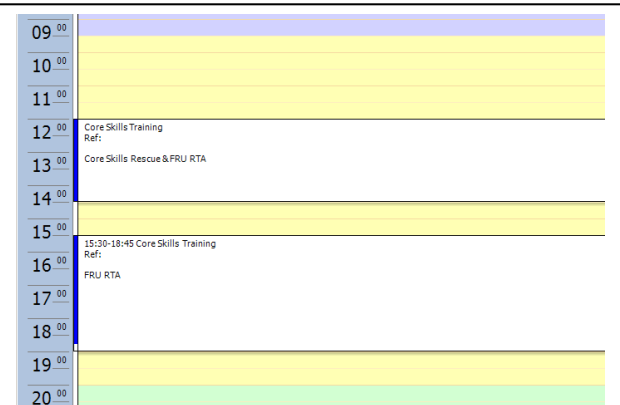

Description	Due
Strategic Resource	01/10/2012
Core Skills Catch Up	02/10/2012
Core Skills Catch Up	02/10/2012
Core Skills Theory Breathing Apparatus	03/10/2012

Core Skills RTA Rescue Theory inclusive of FRU Equipment	28/10/2012

The Training Diary shows a calendar view of training sessions. The sessions are color-coded: yellow for Core Skills, green for FRU RTA, and blue for FRU Equipment. The sessions are scheduled for the week of 1 October to 7 October.

Once these Core Skills sessions have been assigned and confirmed, these will appear the Station Diary as they do now, but with the new times, as shown below

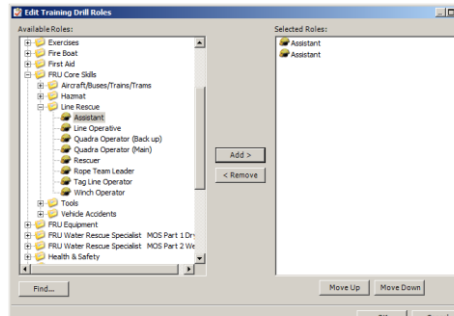

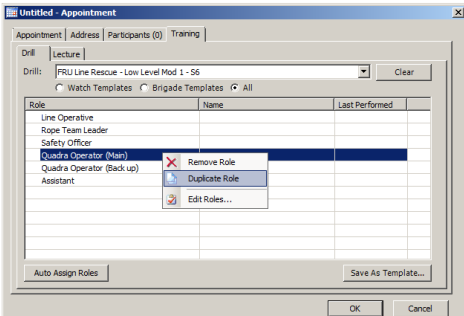

The Station Diary shows training sessions assigned to specific times. The sessions are color-coded: yellow for Core Skills, green for FRU RTA, and blue for FRU Equipment. The sessions are scheduled for the week of 1 October to 7 October.

Participants

It is particularly important to ensure that the appointment participants are recorded against **ALL** the Drill Roles that they complete, as it is the detail of these roles that are passed to the Individual Training Records, not the drill name, or the appointment Description.

It is possible to create **Duplicate Roles** from the Drill Window; using the right-click option menu; or through the **Edit Training Drill Roles**, where you can add roles as many times as necessary.

The Appointment window shows the list of roles and the right-click context menu. The roles are: Line Operator, Rope Team Leader, Safety Officer, Quadra Operator (Main), Quadra Operator (Back up), and Assistant. The right-click context menu options are: Remove Role, Duplicate Role, and Edit Roles...

The Edit Training Drill Roles window shows the list of roles and the right-click context menu. The roles are: Assistant, Line Operator, Quadra Operator (Back up), Quadra Operator (Main), Rope Team Leader, Tag Line Operator, and Winch Operator. The right-click context menu options are: Add, Move Up, Move Down, and Remove.

Activities

Each Core Skills sessions contains a note indicating a specified direction of training. These have been designed to provide the watches with enough time through the six tour lifecycle of the schedule to cover the traditional core skills, FRU specific core skills and integrated session for both. The table below has a list of **guide figures to activities that will deliver a minimum training requirement of 78.5 hours over the 6 week cycle** with brief descriptions that **are not exhaustive but give some examples** of expected activities for each of the nine areas covered,

	Description of Expected Activities	Time available on new schedules
Working at Height & Line Rescue Training	Line rescue skills to be used in conjunction with the line operations maintainance of skills manuals available at stations and via the training support icon. Will be crossed over with core skills working at height.	21.25
