Request:

Traffic Count - Rossett

Historically a number of traffic counts have been undertaken in Rossett, near Wrexham between January 2010 and December 2016.

I would like to know how many traffic counts that consisted of, their location and I would appreciate a table showing the dates of each of the traffic counts together with the number of vehicles counted at each of those dates together with location.

If the figures could be further broken down to particular time bands that would be really useful however if this isn't possible then dates and number of vehicles will suffice.

Response:

2 Speed and Volume surveys have been undertaken on Harwoods Lane. Details are attached.
