I refer to your request for information received on 26th January 2015 concerning vehicles movements to and from Viridor Beddington Energy Recovery Facility.

Your questions have been answered below.

Q.1 Please could I have a breakdown of the number of trucks/vehicles per day that will be going to the Viridor Beddington Energy Recovery Facility site?

The Transport Assessment submitted by the Viridor as part of the planning application provided an estimate of 666 daily two way trips (all vehicles) to and from the site. The Transport Assessment can be found here:

<http://www.viridor.co.uk/assets/Uploads/SouthLondonERF/Environmental Statement/Environmental statement main/Technical Appendices/T A A Scoping/A3%20Traffic%20Assessment%20Scoping.pdf>

Q.2 How many trucks/vehicles will be leaving the site with ash?

Ash will be removed from Beddington Farmlands through 26 daily two-way vehicle movements. For more information please see Table 5-26 and Table 5-27 in Viridor's Transport Assessment.

Q.3 What will be the size of trucks/serving the above?

The vehicles transporting ash from Beddington Farmlands will have a 20 tonne payload.

Q.4 How far will the trucks be travelling?

The distance the vehicles transporting ash from Beddington Farmlands will depend on the end uses for the ash. Therefore, this information can not be provided at this stage.
