Subject: Wellbeing space

Hi all

I hope that you are all doing OK.

I had a thought about any potential helpful offer/use for the wellbeing space at the moment.

No idea what!

Just thought that if there was any requirement for additional community space/storage, we might be able to help with that.

Was thinking it could be made available to volunteers or whoever, obviously recognising all the distancing/isolation requirements that need to be in place. But there is a need to look after the elderly and vulnerable and I suppose I was thinking along those lines if needed.

Just wanted to raise the suggestion with you guys at this point. Not sure whether to put it out there to all steering group members or say nothing and see if anyone asks.

Would welcome your thoughts.
